PROFESSIONAL SUMMARY

.NET/Fullstack Developer with 1+ year of professional experience building enterprise web applications using C#, ASP.NET Core, ABP Framework, Blazor/Blazorise, DevExpress, RESTful APIs, PostgreSQL, Redis, and Hangfire. Hands-on with microservices-oriented personal projects using Clean Architecture, Domain-Driven Design (DDD), Entity Framework Core, JWT/Refresh Token authentication, RabbitMQ, gRPC, YARP API Gateway, Docker, and .NET Aspire. Familiar with React.js, Next.js, Vue.js, TypeScript, Tailwind CSS, and modern frontend integration with backend APIs. Looking for .NET Backend / .NET Fullstack roles focused on scalable APIs and maintainable web applications.

TECHNICAL SKILLS

Backend: C#, .NET 8/9/10, ASP.NET Core Web API, .NET Aspire, Minimal APIs, ABP Framework, Entity Framework Core, Dapper, LINQ, RESTful APIs, gRPC, MediatR, FluentValidation.
Frontend: Blazorise, DevExpress, React.js, Next.js, Vue.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap.
Database & Cache: PostgreSQL, SQL Server, MySQL/MariaDB, MongoDB, Redis, PL/pgSQL, query optimization, stored procedures.
Architecture: Clean Architecture, Domain-Driven Design (DDD), Microservices, Vertical Slice Architecture, SOLID, Design Patterns, Repository Pattern, Dependency Injection, MVC/MVVM.
Security & Auth: JWT, Refresh Token, Cookie Authentication, OAuth, RBAC, Claims/Policy-based Authorization, password hashing, rate limiting, CORS, KMS (Key Management System).
DevOps & Tools: Docker, Git, GitHub, GitLab, CI/CD pipelines, Nginx, PM2, Swagger/OpenAPI, Scalar UI, Postman, pgAdmin.

WORK EXPERIENCE

Fresher .NET Developer - HQSOFT CO., LTD | Ho Chi Minh City **10/2024 - 01/2026**
Ajinomoto VietNam (AVN) - Enterprise Business Platform **11/2024 - 01/2026**
.NET 9, ABP Framework, Blazorise, DevExpress, PostgreSQL, Redis, Hangfire, RESTful APIs
• Developed Sales Order features for distributor workflows and approval processes in an internal enterprise platform.
• Built e-Invoice screens integrated with VNPT VAT generation workflows.
• Designed KPI screens and DevExpress report templates for sales, inventory, and operation reporting.
• Implemented PostgreSQL stored procedures/functions for dynamic reporting, data aggregation, and business calculations.
• Worked across backend APIs, database queries, and Blazor/DevExpress UI components to deliver end-to-end features.
XSPIRE Business Platform - ERP/CRM/DMS/HRM Modules **10/2024 - 12/2024**
.NET 8, ABP Framework, Blazorise, DevExpress, PostgreSQL, Redis, Hangfire, RESTful APIs
• Debugged legacy issues and improved system understanding across modular enterprise applications.
• Developed Master Data management screens using Blazorise and DevExpress UI components.
• Supported modular architecture improvements for inter-service communication and maintainability.
• Automated entity generation and migration workflows using PowerShell scripts.
• Contributed to new modules that consolidated legacy business processes into a unified platform.

PROJECTS

DevConnectors - Developer Community & Job Platform **05/2026 - Present**
ASP.NET Core, Microservices, Clean Architecture, DDD, Vertical Slice, PostgreSQL, Redis, RabbitMQ, gRPC, Polly, YARP, MediatR, .NET Aspire
• Building a developer-focused community and job platform with profiles, posts, communities, job applications, CV management, and event-oriented collaboration features.
• Built the Identity Service with user registration, login, JWT/refresh token flow, user session, role, and permission management.
• Configured YARP API Gateway for service routing and centralized access to backend services.
• Designed domain entities, value objects, aggregates, repositories, and EF Core mappings using Clean Architecture and DDD.
• Created reusable BuildingBlocks packages for result handling, validation, localization, and shared cross-cutting concerns.
• Used MediatR and Vertical Slice Architecture to separate request handling logic by feature.
TapHoaKeyVN - Digital Key Trading Platform **12/2025 - 03/2026**
ASP.NET Core, .NET Aspire, Microservices, Clean Architecture, DDD, Vertical Slice, PostgreSQL, Redis, RabbitMQ, gRPC, YARP, Payment Methods, Google OAuth
• Designed and developed a microservices-based backend for product selling, order workflows, and automated product delivery.
• Implemented JWT authentication, refresh token flow, cookie support, email OTP verification, and Google OAuth login.
• Built a KMS-based security layer to encrypt seller data and support automated delivery without manual seller confirmation.
• Integrated Redis caching, RabbitMQ messaging, Hangfire background jobs, and gRPC for internal service-to-service communication.
• Built RESTful APIs with OpenAPI/Swagger documentation and maintained the system end-to-end as a solo developer.
.NET Microservices Boilerplate - Open-source Project **04/2026 - Present**
ASP.NET Core, Microservices, Clean Architecture, DDD, EF Core, PostgreSQL
• Built a reusable .NET microservices boilerplate with layered architecture, shared building blocks, and common abstractions.
• Configured centralized package/build management with Directory.Packages.props and Directory.Build.props.
• Published the project on GitHub to demonstrate backend architecture design and reusable project setup.
